The Robertsons

Guest Consignor: Wilcox Simmentals

6th Annual Bull Sale
Saturday, March 21, 2009
1:00 P.M.

Ste. Rose Auction Mart
Ste. Rose, Manitoba

BY

Welcome...

Welcome to the 6th annual Bar J Bull sale. This year we are excited to offer another set of bulls deep in quality with the genetics to make them consistent and predictable. Our bulls are bred to perform and have proven themselves in the progeny they sire, both in the commercial and purebred industries. We strive to breed functional cattle that are thick and efficient with superior carcass traits. Our cow herd is powerful and fertile and our bulls combine the best performance and calving ease genetics you will find anywhere in any breed.

The feedlots are asking for more Charolais cross calves and continue to pay premiums for them. It has been this way for decades. The buyers tell me that the good orders they get always have restrictions on certain breeds or types but the one constant is that they all want good Charolais cross calves.

At Bar J, we strive to give you as much information as possible to help you make the right choice in selecting your bull. You can see all the performance info, frame scores, EPD's, ultrasound data and breeding soundness reports to give more credibility to our bulls. At Bar J we do not trim feet so what you see is what you get and we feed no barley so you can feel comfortable that our performance is bred in and not fed on.

This year we are pleased to have Wilcox Simmentals as guest consignors. We are the first to recognize that the Simmental breed has had a huge positive impact on the industry and many of our bull customers utilize Simmental in their crossbreeding programs. I have known the Wilcox family for many years and have great respect for them as people of extremely high integrity and as breeders of some of the finest Simmental cattle you will find. The set of yearlings they are offering is fantastic. These are the right kind of performance cattle with strong maternal traits.

We are in this to stay and we want the bulls we sell to fit your program. Please feel free to talk to us if we can help you in any way with your bull selection.

The first time that the Robertson's invited us to ultrasound, we were very impressed with the muscling in their cattle. The muscle sizes were some of the largest of any yearling bulls that I had ever done. Over the years they have been able to find new sires to compliment the genetics that they have been able to put together. When I think of what Charolais cattle are supposed to be like, the Robertson's herd would fit right into that mold.

Rod Wendorff, Raymond, AB

Windy Ridge Ultrasound

403-330-3000

Rod Wendorff owns and operates Windy Ridge Ultrasound and is the most experienced Ultrasound technician in the country. Rod has scanned more cattle than anyone else in Canada and has an incredible knowledge in his profession, having scanned in excess of 100,000 head in both the feedlot and seedstock industries.

Helge's cell306/536-4261

Welcome...

The "Bar J Charolais" name has become synonymous for high performance, high quality Charolais bulls that can compete at the very front of our beef industry. Year after year the Robertson's bring out an exceptional set of beef bulls. Bulls that will pack on the pounds – but they are also bulls in a complete package with hair, muscle and eye appeal. These bulls are functional in all aspects. Not only are they bred to calve and grow, they are selected for carcass traits and lean meat yield. Check out the ultrasound data and testimonial from Rod Wendorff, Canada's most experienced gatherer of ultrasound information.

The 2009 sale offering is as strong as ever – deep in quality and consistent in type. HERD BULL CANDIDATES – YOU BET! There are sons of both Silverado and Rayder that are outstanding and would do an excellent job of heading up your breeding program – Purebred or Commercial. The Predictable Wind sons are moderate framed and easy fleshing with excellent performance.

It is a real pleasure to have Wilcox Simmentals in as Guest Consignors this year. They are bringing a tremendous set of high performing, red and black Simmental bulls to the sale. Crossbreeding is a must in the commercial cattle industry. Hybrid vigor is the only thing that comes for free in the cattle business – increased fertility, vigor, milk and performance will be achieved through crossbreeding. Both the Simmental and Charolais breeds excel in producing high performing cattle for today's competitive beef industry.

Please call if you would like more information or if I can assist you with your purchase.

Sincerely,
Dale

Semen Testing:

All the bulls will be semen tested within 30 days of the sale by a licensed veterinarian.

No room at the farm...

Yes, we can look after the yearling bulls until you are ready for them. Bar J will keep bulls free of charge until May 1st. Buyers must insure the bulls while being cared for by Bar J. Bulls returning to Bar J can then be picked up anytime at the buyer's convenience.

Or...bulls can be picked up in Ste. Rose on sale day.

Right to Semen...

The sellers retain the option to collect semen on any bull sold in the sale at a future date for their in herd use only. This would be at the sellers' expense and at the bull owner's convenience.

Insurance...

Will be available on sale day. All bulls returning to either Bar J Charolais or Wilcox Simmentals must be insured.

Simmental Breed Average EPD's – Spring 2009

Birth Weight 3.0 Weaning weight 36.3 Yearling weight 60.4
Milk 7.3 Total Maternal 25.5

Charolais Breed Average EPD's – Spring 2009 are:

Birth Weight 2.0 Weaning weight 40.1 Yearling weight 76.4

Milk 20.4 Total Maternal 40.5

Legend...

FS = Frame Score MB = Marbling BF = Back Fat

REA = Rib Eye Area in Square Inches LMY = % Lean Meat Yield

Ultrasound:

Marbling (MB) – The marbling scores will influence the quality grade of a carcass.

Back Fat (BF) – Gives an indication of the bull's fleshing ability.

Rib Eye Area (REA) – The rib eye is the largest muscle in the body so rib eye area gives an indication of over all carcass muscling.

Lean Meat Yield (LMY) – Lean meat yield is the percentage of lean meat in relation in the total carcass weight.

Never before have growth genetics and highly profitable carcass traits been so important to our industry. Never before have efficient, high gaining, early maturing cattle been so critical to our future. It all comes down to what we have been selecting for all these years. That is what we are offering you. To be profitable, a second rate bull just will not cut it any more. Our entire focus has been on the commercial industry and breeding the ultimate terminal cross sire. Take advantage of what we have done and let our cattle work for you.

Clint Robertson

**Picture as featured in
 Canadian Cattlemen,
 Calving Special 2008**

The Bar J cowherd is maintained on native grass and bush pasture. The cows are culled ruthlessly and every female is expected to produce a superior calf. Good feet, correct udders, easy doing ability and high fertility are a must. Failing on any one of these results in a certain cull.

“We are proud to be guest consignors at the Bar J Charolais Sale at Ste Rose Auction Mart. There are both Red and Black Bulls with excellent performance, off A.I. sires. All bulls are halter broke. We feel these bulls will work for you. So, come out and select your next Herd Sire.”

The Wilcox family

The Herdbulls . . .

REMINGTON RED LABEL HR

Polled

Sire of Lot 26

This bull has proven himself to be the most powerful son of Dream On in terms of muscle, performance, body mass and testicular development. He has the ability to sire daughters with easy fleshing ability.

The Herdbulls . . .

FFBB RAYDER PLD 5108R **Polled**

After a long intense search for a bull that would compliment our breeding program, 5108R was a great find. Not only does he have outstanding conformation, easy doing ability and superior performance to meet our standards, but he presents himself with class and that ultimately is what makes him a great herdbull.

BAR J SILVERADO 14S **Polled**

"High selling yearling bull in Canada in 2007. What more can we say about this young sire. He is establishing himself as a great breeding bull that is having a huge impact on the industry. His sons are showing up as lead off bulls across the country. He has proven himself by combining calving ease with performance and puts great dispositions in his progeny. His sons and daughters at Bar J are truly impressive. He puts tremendous thickness and performance in his progeny and still he has proven to be a bull we can use on our heifers. Everyone is talking about the Silverados'."
