**The two bulls** above are from Cubb 85S. They are very similar so we can say the same thing about both of them. They are very long bodied and smooth and should add a lot of length to your calves. Their mothers were half sisters and were both excellent milking cows.

I purchased Luther's dam at the historic Isla Bank dispersal and she was one of the high selling cows that day. She is A.I. sired by Connealy Bottomline who was used lightly and so this is a relatively fresh pedigree. Luther is sired by LLB Luther who is known for calving ease. He sold at the dispersal as an aged sire for \$11,000.00. 18U displays very good hair, growth, shape and bone. Actual WW was 750.

**A Note on EPDs**

EPDs are a tool to predict traits of an animal based on traits from their pedigree. Accuracies vary, and, in particular, EPDs CANNOT be compared across different breeds—only within a breed. Below are the latest average EPDs for the breeds (taken from the association websites).
